

ACROGEL

Alginate Dental Impression Material

Acrogel is a dental fast set, dust free impression material based on alginate and is prepared from good quality materials according to standard regulation ISO 1563 and ADA No, 18.

APPLICATION:

- 1- Impression for removable full and partial prosthesis and chromes.
- 2- Impression for temporary crown and bridges.

ADVANTAGE:

- 1- Easy mixing with water and dust free.
- 2- Homogenous paste and thixotropic consistency.
- 3- Excellent elastic properties.
- 4- Long dimensional stability.
- 5- Homogenous mass, smooth and compact surface.
- 6- Green color with pine apple flavor.

SPECIFICATION:

No	Specification	Unit	Required	Obtained
1	Mixing time	Sec	30	25-35
2	Working time	Sec	60	95±5
3	Setting time	Sec	155	155±5
4	Consistency	mm	31	30-33
5	Linear shrinkage	%	0/5	0/4-1/5
6	Recovery of deformation	%	96	≥ 95

PACKAGING:

Pack 500 gr aluminum laminate bag
 Each box 16 bag + water & + powder measures + instruction touse
