# ACROLIME

## Co2 Absorbent In Anesthetic System

Acrolime is a porous granular Sodalime absorbent for removal of acidic contaminants like CO<sub>2</sub> in gas stream. This product made of calcium hydroxide and additives.

### APPLICATION:

- 1- Anesthetic system and hypoboric oxygen units.

### ADVANTAGE:

- 1- Low density and large surface area.
- 2- High CO<sub>2</sub> absorbing capacity.
- 3- Color change after saturation (pink to white).
- 4- Good mechanical property against crushing.

### PACKAGING:

- PE 5 Lt jerican
- PE 10 Lt jerican
