

ACROPARS BF

Cold Mold Seal

Acropars BF is a separating solution and is designed on basis of sodium alginate. This product generates a thin isolating film between mold stone and acrylic denture. Acropars BF has a good shelf life.

APPLICATION:

1- Isolation film on full and partial denture mold.

ADVANTAGE:

- 1- Creating uniform separating film. On mold surface.
- 2- Easy detachment of denture from mold.
- 3- Pink color for complete coverage identification.
- 4- Stability for long time.
- 5- Fragranced

PACKAGING:

Powder 10 kg laminate bag.
Liquid 500 ml in plastic bottles.
